## **Gatekeeper Systems Wins Breakthrough Contract in Transport Sector**

IRVINE, Calif.--(BUSINESS WIRE)--Gatekeeper Systems Inc., ("the Company" or "Gatekeeper") (LSE:GKR) the leading global provider of intelligent shopping cart solutions, announces that it has received a contract for up to Euros 500,000 from Espresso Deutschland GmbH ("Espresso"), one of the world's largest premium baggage trolley manufacturers and a key commercial partner of the Company.

The contract is for the supply of the Gatekeeper GS<sup>2</sup> wheel locking system which will be installed in approximately 2,500 shopping trolleys to be manufactured and supplied by Espresso to all main railway stations in Italy operated by a local Italian service provider. This deal represents a significant breakthrough by Gatekeeper in a major new sector.

Espresso selected the GS<sup>2</sup> system after comparing its effectiveness and cost advantages over other technologies. GS<sup>2</sup>, developed and patented by Gatekeeper, deters the theft, removal or misuse of shopping trolleys beyond an electronically controlled perimeter, and is used by many of the world's leading retailers.

The trolleys will be supplied over the next 12 months and will be provided to rail travellers at eight main stations in Italy, namely Rome, Florence, Palermo, Venice, Naples, Verona, Milan and Turin. Although baggage trolleys are already available at these stations at present, the GS<sup>2</sup>-equipped trolleys will substantially improve their movement and use within designated areas.

Marc Vuegen of Espresso said: "Gatekeeper's solutions are field proven and are the ideal solution for our customers' requirements to better control the use of trolleys. This contract is a showcase for the rail sector and could also be highly beneficial for other transport hubs such as airports."

Michael Lawler, chief executive of Gatekeeper, said: "We are delighted to partner with Espresso in providing a highly effective trolley management solution for rail industry. Gatekeeper's systems are already setting the benchmark in the retailing sector and this contract demonstrates how our technology is being leveraged to meet the needs for other sectors such as the transport industry."

### **About Gatekeeper Systems**

Gatekeeper Systems, Inc. is a leading global provider of intelligent shopping cart solutions for retailers to prevent cart loss, merchandise theft, and to maintain high customer service and environmental standards. Headquartered in Irvine, California, Gatekeeper's solutions are used by major retailers in the US, Europe and the Far East.
