

Powering an Integrated Loss Prevention Ecosystem

1

DETECT

The Purchek® solution effectively **detects** trolleys that have not met the criteria for exit and captures a high-definition event triggered video.

Purchek®

5

ACTION

Complementary loss prevention solutions are force multipliers for retailers. Take **action** and deter returning offenders with customer service or build cases quickly for law enforcement response, arrest, and prosecution.

FACEFIRST

4

ENRICH

Investigators can **enrich** enrollments with a FaceFirst visitor search, showing when, where, and how often the individual has been in the retailer's stores. Detect associated vehicles and license plates, and prior incidents of theft or violence.

FACEFIRST

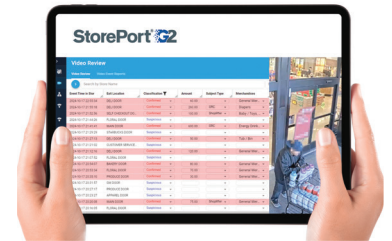

2

VERIFY

Gatekeeper Systems' Theft Intelligence Services initiate investigation, **verifying** pushout activity and flagging cases for retailer's further review and action.

Purchek®

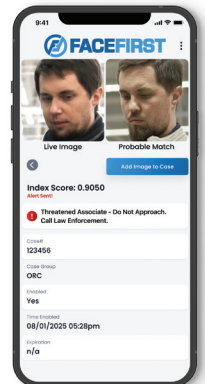

3

ENROLL

Following policies and procedures, the retailer **enrolls** the individual to an encrypted database of known offenders with the action to be taken if the individual returns (e.g. provide customer service, do not approach).

Purchek®

Gatekeeper Systems' Purchek® solution successfully prevents trolley-based theft without the need of confrontation. Trolleys that have not met the criteria for exit are stopped at the door and event-triggered video captures the event enabling additional investigation. Combat ORC and opportunistic theft activity without disrupting the experience of your trusted and loyal shoppers.

FACEFIRST

FaceFirst is a highly accurate face matching solution designed for retailers. As the frequency and severity of in-store violence and theft escalate, FaceFirst's AI-enabled face matching software helps create safer places to work and shop. The FaceFirst software turns traditional CCTV security cameras into proactive tools to prevent violence and loss by alerting instantly when a known threat enters your stores.
